AL: Negociado de Energía de Puerto Rico (NEPR)

DE: Tania Rivera Marquez

ASUNTO: Querella Formal por Fluctuaciones de Voltaje Fuera de Rango Normativo (Baja Tensión)

NÚMERO DE QUERELLA (LUMA): C25120300205

A LOS HONORABLES MIEMBROS DEL NEGOCIADO DE ENERGÍA:

Yo, Tania Rivera Marquez, mayor de edad y residente Urb. April Gardens J3 calle 14 Las Piedras PR 00771, comparezco ante este Negociado para presentar formalmente mi caso relativo al servicio de energía eléctrica provisto por LUMA Energy en mi propiedad.

I. EXPOSICIÓN DE MOTIVOS Y BASE LEGAL

Esta reclamación se ampara en la Ley Núm. 114-2007, según enmendada por la Ley Núm. 141-2019, la cual garantiza el derecho de los consumidores a recibir un servicio eléctrico de calidad, confiable y seguro. La Ley 141-2019 establece la responsabilidad del operador de mantener la infraestructura en condiciones que no perjudiquen a los abonados ni sus equipos.

Conforme a los estándares de la industria eléctrica aplicables en Puerto Rico, el voltaje de suministro en baja tensión debe mantenerse dentro de un rango de tolerancia del **±5%** respecto al valor nominal. Por lo tanto, los rangos permitidos son:

Para Servicio Nominal de 120V: El rango normativo es de **114V a 126V**.

Para Servicio Nominal de 240V: El rango normativo es de **228V a 252V**.

II. DATOS TÉCNICOS REGISTRADOS

A través del monitoreo realizado con mi equipo de medición de **tesla powerhub, ej. STE20250815-00633]**, se han obtenido los siguientes datos objetivos sobre el estado de la red en mi punto de consumo:

Voltaje Promedio Detectado: 255V

Voltaje Mínimo Detectado: 245V

Voltaje Máximo Detectado: 265V

III. INCUMPLIMIENTO Y RIESGOS

De los datos presentados se desprende que el suministro eléctrico ha alcanzado valores de **[265V]**. Si se considera una conexión de 240V, este valor excede el límite superior de **252V** establecido por norma. Esta fluctuación constante hacia el umbral superior de tolerancia pone en riesgo crítico la integridad de mis electrodomésticos, equipos electrónicos y, de manera muy especial, el sistema de inversores solares, los cuales están programados para desconectarse ante tales variaciones para evitar daños internos, privándome del beneficio de mi inversión en energía renovable.

IV. SOLICITUD

Por todo lo antes expuesto, y bajo la protección de la Ley 141-2019, solicito a este Honorable Negociado:

Que ordene a LUMA Energy la corrección inmediata de los niveles de tensión en el transformador o línea de servicio que alimenta mi propiedad.

Que se certifique que el voltaje se mantiene dentro de los rangos de **228V-252V (fase 240V)**.

Que se me mantenga informado sobre las acciones correctivas tomadas bajo la querella **[C25120300205]**.

Cordialmente,

787-664-7673
