GOVERNMENT OF PUERTO RICO PUBLIC SERVICE REGULATORY BOARD PUERTO RICO ENERGY BUREAU

KENNETH HOPSON ADLEY Petitioner

v.

LUMA ENERGY, LLC LUMA ENERGY SERVCO, LLC Respondents

Case Nos.: NEPR-QR-2026-0184

MOTION REQUESTING THE BUREAU TO TREAT NEPR-QR-2026-0184 AS AN RV-TYPE FILING FOR PURPOSES OF ADJUDICATION

TO THE ENERGY BUREAU:

COMES NOW the Petitioner and respectfully STATES and REQUESTS:

Although the December filing was docketed as **NEPR-QR-2026-0184** due to Petitioner's inadvertent selection of "complaint" rather than "final determination revisions," the matter concerns a billing dispute, procedural defects, and a lack of investigation under Regulation 8863, Section 4.12(F). These issues fall squarely within the scope of an RV-type review, which requires formal adjudication and evidentiary development.

Petitioner respectfully requests that the Bureau treat the December matter consistent with its RV nature for all adjudicative purposes, including its alignment with the February and March objections currently proceeding under RV-type review.

WHEREFORE, Petitioner respectfully requests that the Bureau:

1. Treat NEPR-QR-2026-0184 as an RV-type filing for purposes of adjudication; and
2. Grant any other relief or pronouncement that may be appropriate in law.

Respectfully submitted in San Juan, Puerto Rico, on this 4 day of June 2026.

Kenneth H. Adley, JD/MBA
Petitioner
