KENNETH H. ADLEY Petitioner

v.

LUMA ENERGY, LLC LUMA ENERGY SERVCO, LLC Respondents

CASE NOS.: NEPR-QR-2026-0184

CORRECTED MOTION

MOTION TO CONTEST DELAY AND REQUEST SCHEDULING OF CONSOLIDATED HEARING

TO THE PUERTO RICO ENERGY BUREAU:

Petitioner, **Kenneth H. Adley**, respectfully contests the continued procedural delays in the captioned matters and requests that the Bureau schedule the consolidated hearing previously requested by both parties. Each month of delay has contributed to a broken administrative chain affecting multiple billing cycles, multiple examiners, and multiple LUMA attorneys.

I. Consolidation was requested by both parties, but the consolidated hearing has not been scheduled

1. On June 5, 2026, LUMA filed a Motion Requesting Consolidation in Case No. NEPR-RV-2026-0057, stating that both matters concern the same account and involve the same facts and legal grounds.

2. On June 6, 2026, Petitioner filed a Motion Agreeing to Consolidation and Informing Availability, confirming that both matters arise from the same service account and involve a continuous sequence of related billing objections.

3. The two matters identified for consolidation are NEPR-RV-2026-0079 and NEPR-QR-2026-0184.

4. Both parties identified June 22, 2026 as a workable date for the consolidated hearing.

5. As of July 13, 2026, the consolidated hearing has not been scheduled, and the matters remain pending without a designated hearing date.

II. NEPR-QR-2026-0184 should be treated as an RV-type matter for consolidation

1. On June 4, 2026, Petitioner filed a Motion Requesting the Bureau to Treat NEPR-QR-2026-0184 as an RV-type Filing.

2. That motion explained that the December matter concerns a billing dispute, procedural defects, and a lack of investigation under Regulation 8863, Section 4.12(F), and that these issues fall squarely within the scope of an RV-type review.

3. Petitioner therefore requests that NEPR-QR-2026-0184 be treated as an RV-type matter **for purposes of consolidation** with NEPR-RV-2026-0079, which arises from the same service account and the same sequence of billing objections.

4. Petitioner further notes that the QR-default posture may prevent adjudication of the procedural-defect issues central to this matter—including notice, docketing irregularities, and investigation failures under Regulation 8863—such that Petitioner would be procedurally prejudiced if these issues cannot be reached in an RV-type evidentiary setting.

III. July 12 military-orders extension introduces additional delay

1. On July 12, 2026, LUMA filed an Informational Motion Regarding Notice to the Energy Bureau, stating that the undersigned attorney would be temporarily absent under military orders and that her workload would be reassigned to other members of LUMA's litigation team.

2. LUMA's filing requests a thirty-day period to announce new legal representation and a thirty-day extension for any pending order or scheduled matter.

3. Multiple LUMA attorneys have appeared in these matters, and the July 12 extension introduces additional delay in a set of cases already affected by multi-month procedural irregularities.

4. The extension affects scheduling of the consolidated hearing previously requested by both parties.

IV. Each month's delay adds to the broken administrative chain

1. Across the December, January, February–March, April, and May billing cycles, Petitioner has experienced late or missing Determinations, mis-docketing, failures to investigate, inconsistent examiner assignments, delayed hearings, delayed orders, and attorney-driven postponements.

2. These issues span multiple examiners and multiple LUMA attorneys, demonstrating a cumulative administrative breakdown rather than isolated irregularities.

3. The pattern of delay across months and across personnel has materially affected Petitioner's ability to obtain timely adjudication of related billing objections arising from the same service account.

V. Request for Relief

1. Petitioner respectfully requests that the Bureau treat NEPR-QR-2026-0184 as an RV-type matter consistent with the June 4 motion.

2. Petitioner further requests that the Bureau order consolidation of NEPR-RV-2026-0079 and NEPR-QR-2026-0184 as requested by both parties.

3. Petitioner requests that the Bureau schedule the consolidated hearing at the earliest date the Bureau deems appropriate.

4. Petitioner finally requests that the Bureau consider the cumulative administrative impact of multi-month delays across multiple examiners and multiple LUMA attorneys.

Respectfully submitted, San Juan, Puerto Rico **July 14, 2026**
